To be watchman over the old water heater isn't a

pleasant duty at any time. It's work running up and down stairs several times a day to be sure the heat is on. It's no fun cleaning up litter or worrying about how much hot water is on tap. You can end this nuisance forever by installing a Westinghouse Electric. This automatic water heater never needs pampering. Once installed, you forget it - it never forgets you. Ask us to tell you how easy it is to own a Westinghouse and how economically it operates at our low heating rate.
